

SMART, SECURE POINT-TO-MULTIPOINT RADIO

VHF, 220 MHz, and UHF licensed bands

Smart, secure, point-to-multipoint SCADA communications for oil, gas and utility monitoring and control

- Secure: with its defense in depth approach, including AES encryption, authentication, address filtering
 and user access control including RADIUS, the Aprisa SR protects against vulnerabilities and malicious
 attacks.
- Future-proof: the Aprisa SR supports dual serial and dual Ethernet ports in a single, compact form factor, designed to cryptographically secure legacy serial, protect existing device investment, and enable new applications. Old and new application protocols can be run side by side.
- Advanced L2 / L3 capabilities: selectable L2 bridge, L3 router, or advanced gateway router combination L2/L3 modes with VLAN, QoS, NAT, and filtering attributes to maximize capacity in constrained bandwidth and prioritize mission critical traffic while meeting tough security and IP network policy imperatives.
- Adaptable: the Aprisa SR integrates into a range of network topologies, with each unit configurable
 as a base station, repeater or remote station; connect multiple RTUs / PLCs to a single radio.
- **Flexible:** the Aprisa SR integrates into a range of network topologies, with each unit configurable as a base station, repeater or remote unit. Support for NMEA GPS receiver option.
- Link efficiency: forward error correction maintains the integrity of the wireless connection while an
 effective channel access scheme and IP routing ensures efficient transfer of data across the Aprisa SR
 network. Advanced payload and Ethernet / IP / TCP / UDP header compression.
- Reliable and robust: the Aprisa SR requires no manual component tuning and maintains its performance over a wide temperature range using full specification industrially rated components and shared Aprisa family heritage.
- Easily managed: an easy to use GUI supports local element management via HTTPS and remote element
 management over the air and SNMP support allows network-wide monitoring and control via a variety of
 supported third party network management systems.

The Aprisa SR in brief

- VHF, 220 MHz, and UHF licensed bands
- RS-232 and IEEE 802.3 protocols
- Software selectable 12.5 kHz, 15 kHz, 25 kHz, 30 kHz, 50 kHz, and 100 kHz (note 2) channel sizes (frequency band dependent)
- Data rates of up to 128 kbit/s
- QPSK modulation
- Selectable error correction of min, max or no FEC
- AES-CCM to NIST SP 800-38C
- Ethernet and IP / TCP / UDP header compression (ROHC) and payload compression
- Software selectable dual / single antenna port operation
- Transparent to all common SCADA protocols
- Dedicated alarm port and optional GPS for radio coordinates
- Protected station and remote station options
- Power optimized option
- Layer 2 bridge (VLAN aware), layer 3 router, and advanced gateway router combination L2/ L3 modes
- VLAN tagging and Q-in-Q
- Flexible QoS priority enforcement by port or traffic type, VLAN, PCP/DSCP, rule including SMAC/DMAC, IP address and IP protocol, and EtherType
- L2 / L3 / L4 filtering
- Fully compatible with Aprisa SR+ in 'SR mode'
- Substation hardened to IEEE 1613 class 2 and IEC 61850-3
- 30 kV ESD antenna protection
- Class 1, Division 2 for hazardous protection
- –40 to +70 °C operational temperature without fans
- 210 mm (W) x 130 mm (D) x 41.5 mm (H)
- Complies with EU RED (2014/53/EU)

Aprisa SR applications

- Offshore rigs and onshore pump jacks
- Transmission pipelines
- Electricity generation plants and turbines
- Power storage and distribution
- Water and waste processing plants

SYSTEM SPECIFICATION

2 x Ethernet ports + 1 serial port POWER OPTIMIZED Providing optimized power and sleep mode
POWER OPTIMIZED Providing optimized power and sleep mode
Aprisa SK+ Protected Station providing not-swappable
/ hot-standby redundant hardware switching (13.8 VD or 48 VDC)
GPS RECEIVER Support for NMEA GPS receiver with radio coordinates
POWER
INPUT VOLTAGE 10 – 30 VDC (13.8 V nominal)
RECEIVE All bands except 320 MHz < 3 W in active receive state
< 2 W in idle receive state, < 0.5 W in sleep mode
320 MHz < 7 W
TRANSMIT 135 and 220 MHz < 26 W
400 and 450 MHz < 28 W
320 MHz < 35 W
MECHANICAL
DIMENSIONS 210 mm (W) x 130 mm (D) x 41.5 mm (H)
WEIGHT 1.25 kg
MOUNTING Wall, Rack or DIN rail
ENVIRONMENTAL
OPERATING TEMPERATURE −40 to +70 °C
HUMIDITY Maximum 95 % non-condensing
MANAGEMENT & DIAGNOSTICS
LOCAL ELEMENT SSH and HTTP/S web servers with full control / diagnost
Partial diagnostics via LEDs and test button
rartar diagnostics via EEDs and test batton
Software upgrade from PC or USB flash drive

- 3. 100 kHz subject to EU RED verification

ABOUT 4RF

ADAPTIVE BURST SUPPORT

Operating in more than 140 countries, 4RF provides radio communications equipment for critical infrastructure applications. Customers include utilities, oil and gas companies, transport companies, telecommunications operators, international aid organisations, public safety, military and security organisations. 4RF point-to-point and point-to-multipoint products are optimized for performance in harsh climates and difficult terrain, supporting IP, legacy analogue, serial data applications.
